8. EXPLANATORY.

I want to drill the proposed wells to develop enough water to irrigate the 100 acres sought in water right 18-672. My current wells, authorized under perfected rights, seem to produce just enough water for those rights, so I've realized that to develop the 100 acres sought in 18-672 I will need more sources.

I also seek to revise the proposed ground to be irrigated: instead of stacking it as heretofore on places covered by other rights (18-86 and 18-381) I will place this water mostly on ground not covered by any other rights, but the rest of the ground I'm planning to irrigate is covered by 18-87. That's why I have included 18-87 because its acreage is to be revised. I have not included 18-86 and 18-381 because the proposed ground to be irrigated hereafter with this change is not the same as any of the ground under those rights.

For the benefit of all interested persons and clarification in your review process, I've attached a heretofore map, a hereafter map, the proof map on 18-87, and the adjudication map prepared for 18-381. These last two maps together are intended to show that some of the acreage on 18-87 was supposedly revised but without the filing of a change application at the State Engineer's office to correct the records. Since that acreage has possibly been modified with no change application ever filed, I'm including 18-87 to correct the record, so that when I file proof, the correct ground will be specified for 18-87 as well as 18-672.
